

WELL SOUNDING & DEPTH-TO-WATER TESTING AGREEMENT

CURTIS WATER & WELL TESTING

This agreement authorizes **Curtis Water & Well Testing** to enter the property listed below for the purpose of performing **well flow test or depth-to-water measurements**. The test will determine the static water level, and if applicable, the total depth of the well or drawdown under pumping conditions.

Well Address

Planned Measurement Date

The property owner understands that well sounding requires access to the well head and measurement through an existing well cap, vent, or sanitary seal opening. The technician may need to temporarily remove or loosen fittings, electrical conduits, or cap bolts to properly access the well casing for measurement.

The property owner acknowledges that Curtis Water & Well Testing technicians will exercise due care to prevent damage or contamination of the well system during testing. However, the technician and Curtis Water & Well Testing are not responsible for incidental damage to well caps, wiring, conduits, or fittings associated with normal access and testing procedures.

The property owner agrees to render payment for the requested well sounding/performance testing service(s), per the frequency and payment schedule defined below, prior to or at the time of testing.

REQUESTED WELL SOUNDING SERVICES

- Static Water Level Measurement (\$150)
- Well Pump Performance Testing (\$650)

REQUESTED TESTING SCHEDULE*

- One Time
- Annual
- Bi-Annual
- Quarterly

*PAYMENT SCHEDULE (ALL COST GIVEN AS % OF ONE TIME PRICING)

Annual: First test 100%, second 50%, all subsequent 75%.

Bi-Annual: First test 100%, second 50%, third 45%, all subsequent 65%.

Quarterly: First test 100%, second 50%, third and fourth 45%, all subsequent 60%.

Note: Clients are free to stop or move between sampling plans at anytime.
